WORK EXPERIENCE

Intern Software Engineer

SLTMobitel , Sri Lanka 2025 JANUARY - PRESENT

- Collaborating on the development and enhancement of an existing product using the Laravel framework and PHP.
- Contributing to backend development, including feature implementation and debugging.

PROJECTS

PARK'N GO 2023 MAY - 2024 MAY
Parking Management System

Developed an all-in-one centralized parking management system for Sri Lanka, addressing significant challenges in the current parking ecosystem. This project includes two user-friendly mobile applications designed for drivers and parking officers, enabling real-time data access, navigation to available parking spaces, and seamless payment processing. Additionally, a comprehensive web application serves companies and administrators, fostering effective communication between parking officers and parking spaces.
